They were collated by the Industrial Chemistry Branch, so I would say they are correct, albeit maybe a month or two old now.

I believe that these same figures were sent in response to some QFRS –Mary, Hans – correct?

So, it may be best to keep consistent since ultimately going to the same place.

I just want to ensure that we have the ballpark numbers correct—only 12 new PFAS in the last 3 years. However the letter is pretty exacting and specific so if those numbers are wrong, we wouldn't want to send out the letter with bad information.
Do we have any reason to think those numbers are wrong?

According to ur records...of course this thing has been around so long it could be a few more...do you want to hold it up longer to get refreshed numbers???

So since Lautenberg passed, a total of only 12 PFAS have come to market (2 PMN NOCs and 10 LVEs). Is that correct?

Hi Alex. Attached is our draft response to Rep Tonko on PFAS as edited by OCIR (redline). OCIR is asking whether this can go out under Troy Lyons signature since generally he is signing oversight responses (unless an AA wants to sign). If he is to sign it has to by Thursday, his last day. Note that I had Tala review their edits for accuracy and she made one edit that Sven approved which is reflected in the attached. Please advise.

M

Congressional Team – would Alex be ok with Troy Lyons signing the response. Generally Troy is signing oversight responses, unless an AA particularly wants to sign. Attached is the incoming, the RLSO (shows

OCIR edits) and the clean version. Please let me know if ok, and by the way, Troy's last day is Thurs, June 6, if we miss that window it's back to Alex. Thanks,
Sven
